

BORDERLESS LIBRARY

-Borderless Library using reprogrammable and moveable glass C-pods.

-Every funny human behaviors are displayed behind glass, as if in shop windows to seduce new students. The transparency glass is also a minimal intervention to the historical structure and make it easy for building virtual environment inside the VR glass.

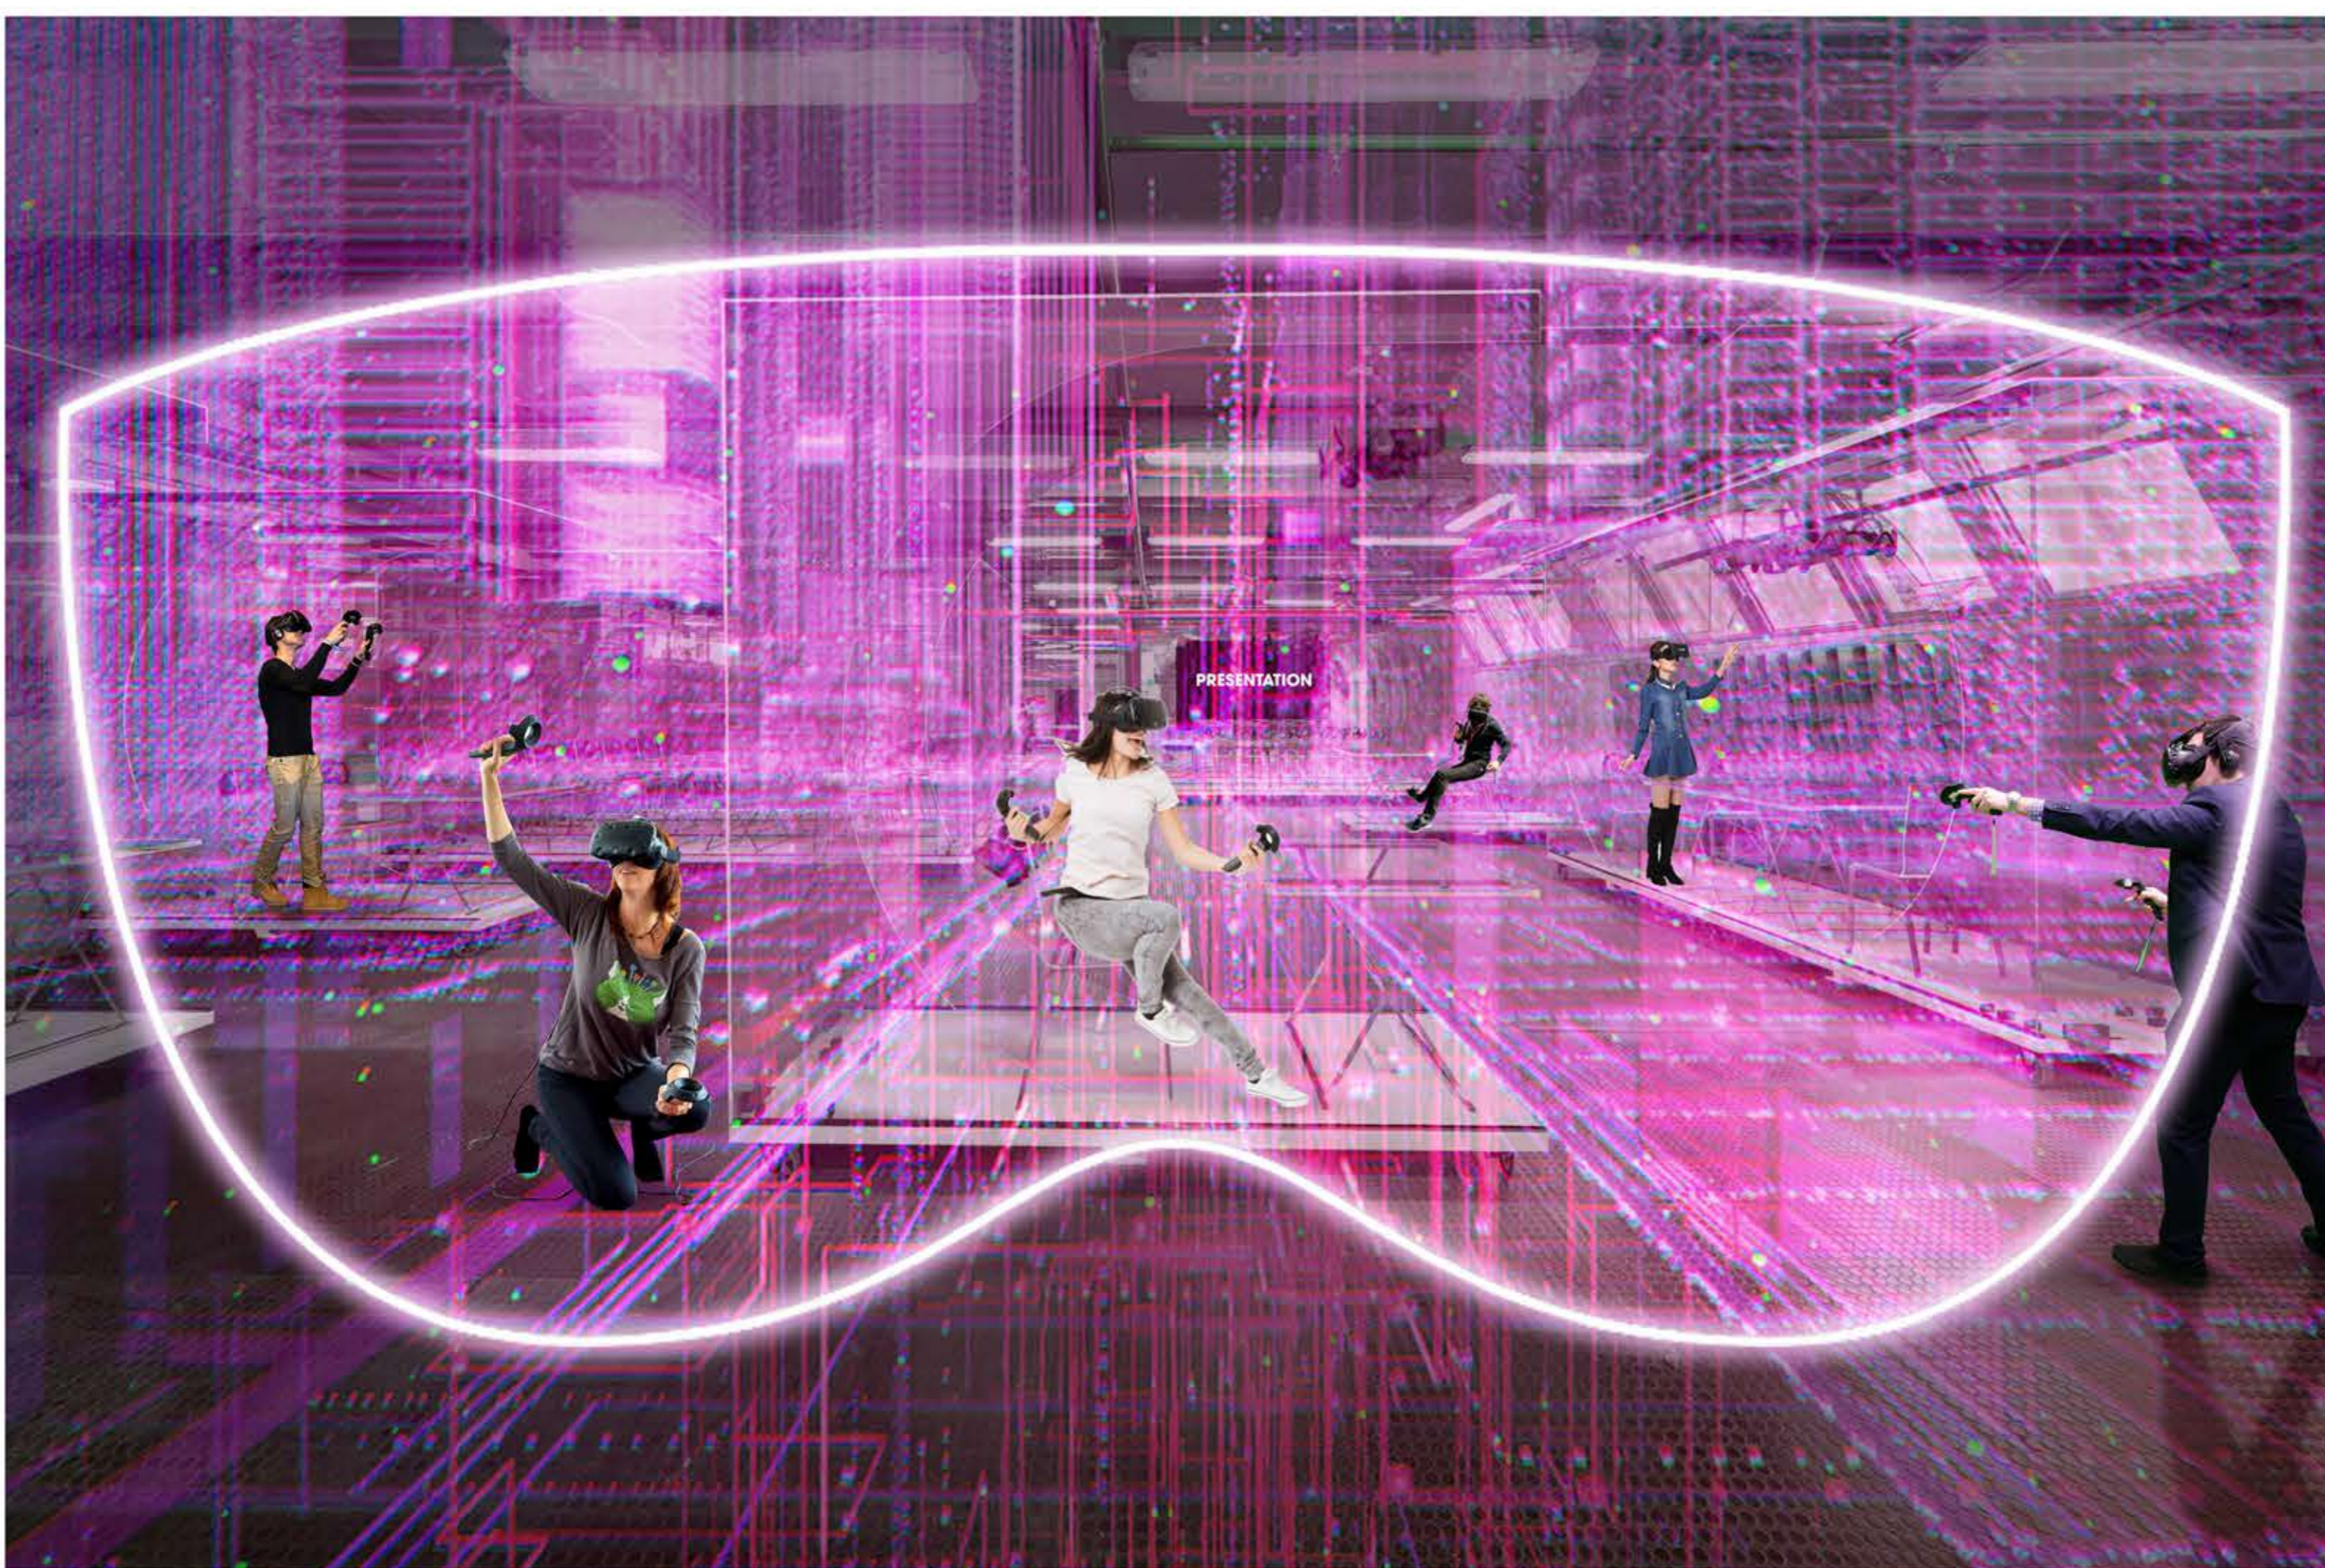

-The design is a sustainable, people centric, connected, self contained, and flexible plug'n play working space solution that caters to the needs of students, the freelancers and the creative-class.

- C-pod consists of a basic unit configuration - a glass module. The units are booked and accessed using digital service.

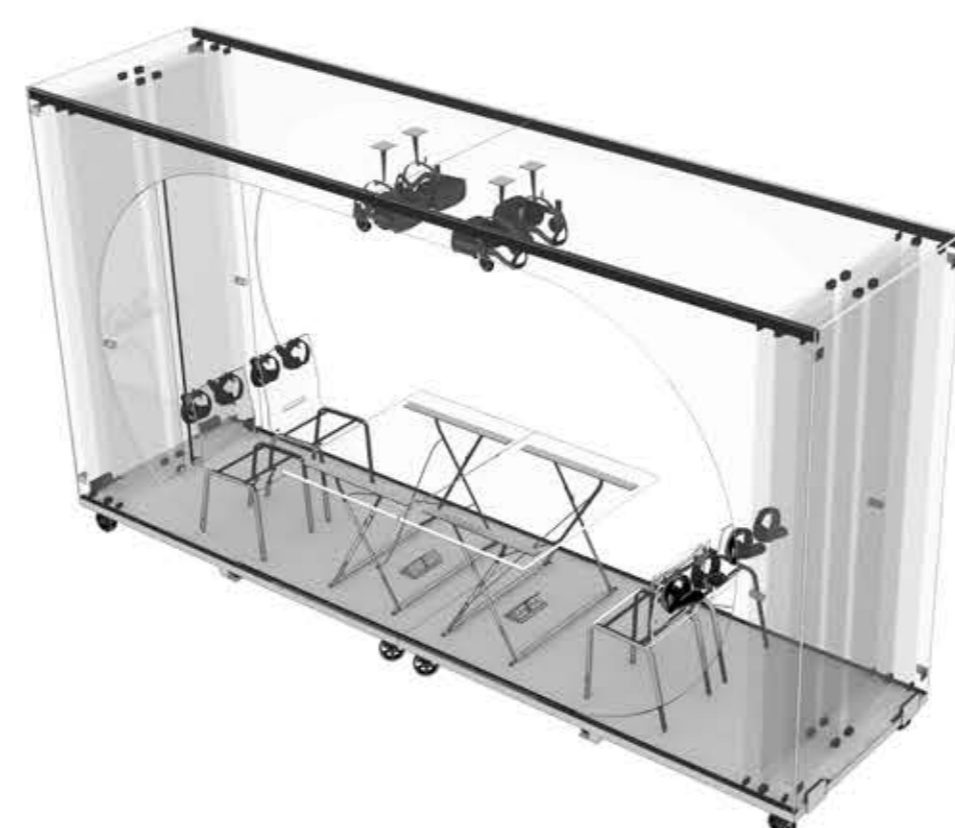

-Users can customize their study space tailored to their needs over the times.

-This unfinished pod always has three-side open or one-side open to expect a connection to other pods.

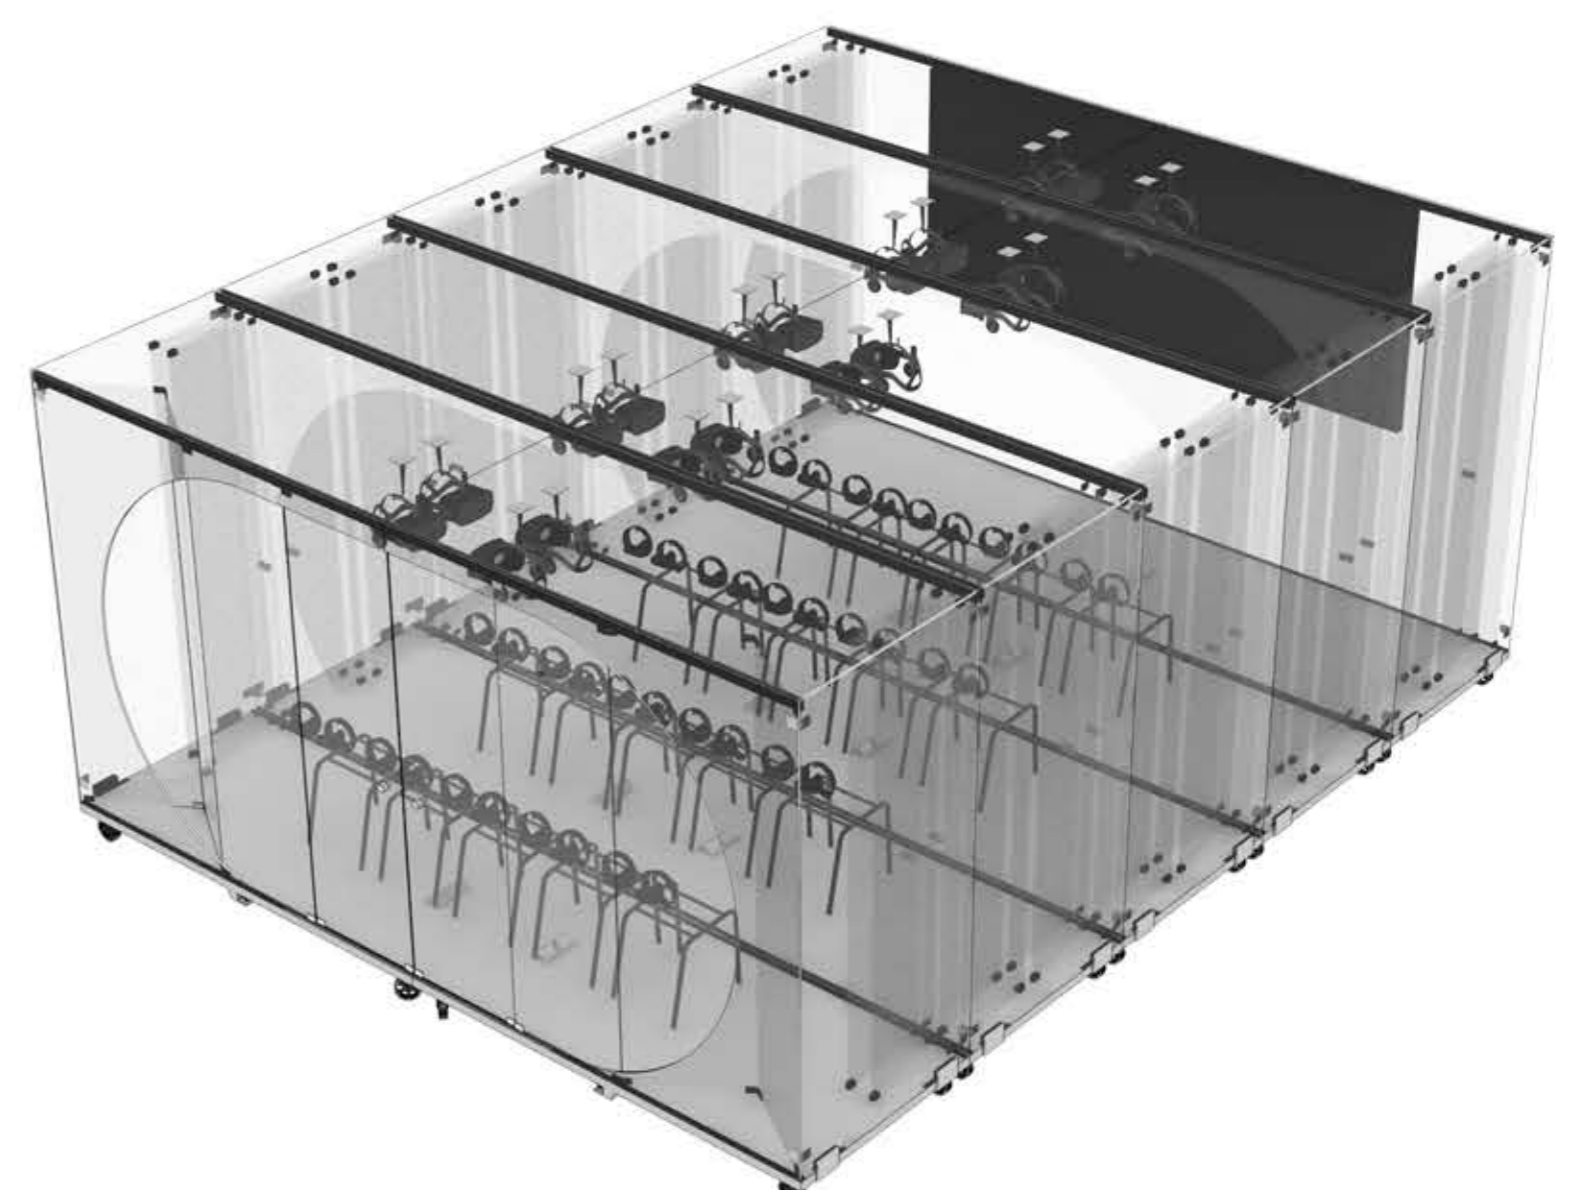

-It provokes a co-working environment and a connection between people.

Single glass C-pod is charged before using.
Dimension : 1.2x2.4x2.5m
